DETAILED ACTION

1. Claims 1-43 are presented for examination.

Election/Restrictions

2. Restriction to one of the following invention is required under 35 U.S.C. 121:
 - I. Claims 1-18, 38-43 are drawn to network resource access controlling, classified in class 709, subclass 229.
 - II. Claims 19-30 are drawn to computer network monitoring, classified in class 709, subclass 224.
 - III. Claim 31-37, are drawn to computer network access regulating, classified in class 709, subclass 225.
3. Inventions I, and II are related as subcombination disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. The following case instants:

Invention I, discloses providing an security indicated access point with a security criterium indication and distributing said security criterium indication to said packet data support node, without the features of invention II and III.

Invention II, discloses receiving and detecting an access point security indication from said security indication providing and distribution means within said gateway node without the features of invention I and III.

Invention III, discloses provisioning of an access point with a security criterium indication indicating which access point connections are allowed simultaneously over the access point without the features of invention I and II.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. A shortened statutory period for response to this action is set to expire ONE month, or 30 days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned (35 U.S.C. § 133).
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liang-che Alex Wang whose telephone number is (571)272-3992. The examiner can normally be reached on Monday thru Friday, 8:30 am to 5:00 pm.
